Package: factorweave (via r-universe)

November 2, 2026

Type Package

Title Factor Weave Quant-Factor Data API Client

Version 0.1.0

Description R client for the Factor Weave quant-factor data API (<https://factorweave.com/>). Daily factor scores, vector similarity search, leak-free forward-return labels, and derived market analytics (factor dispersion, regime, risk-cluster tags, 32-D embeddings) for ~12,000 US-listed tickers. Factor Weave is a research substrate: factor similarity does not forecast returns (cross-sectional information coefficient is statistically zero on a leak-free test); only risk-coherence shows a meaningful signal.
